### 5.2 Measurement system 测量系统

#### 5.2.1. LCM Viewing Angle

Viewing angle is the angle at which the contrast ratio is greater than 10. The angles are determined for the horizontal or x axis and the vertical or y axis with respect to the z axis which is normal to the LCD surface.

#### 5.2.2. Response time

Response time is the time required for the display to transition from white to black (Rising time, Tr) and from black to white (Falling time, Tf) for additional information.

#### 5.2.3. Contrast Ratio (CR)

Contrast Ratio=

Contrast Ratio (CR) is defined mathematically as:

\_\_\_\_

Surface Luminance with all black pixels

Surface Luminance with all white pixels

Surface luminance is the center point across the LCD surface 500mm from the surface with all pixels displaying white.

### 10.2 Storage Method 存储方法

1. Store in an ambient temperature of 23°C±5°C, and in a relative humidity of 55%±15%. Don't exceed 12 months and expose to sunlight or fluorescent light.

存储环境温度为 23±5°C,相对湿度为 55%±15%,存储不能超过 12 个月,不要长时间暴晒。

2. Store in a clean environment, free from dust, active gas, and solvent.

存储在一个干净的环境,不受灰尘,活性气体和溶剂污染。

3. Store in antistatic container. 存储在防静电环境

### 11 Announcements 注意事项

1.Do not attempt to disassemble or process the LCD module.

请勿拆卸液晶显示模块。

2.Do not make extra holes on the printed circuit board, modify its shape or change the positions of components to be attached.

不要在印制电路板上钻额外的孔,修改形状或更改印制线路板上元件的位置。

3.Except for soldering the interface, do not make any alterations or modifications with a soldering iron; Ensure welding temperature at 320 ° C to 350 ° C, the welding time control within the 10 s, welding note don't stay too long in the same place to avoid scald FPC.

除焊接接口外,不要用烙铁做任何更改;焊接温度保证在 320°C-350°C,焊接时间控制在 10S 以内,焊接时注意不要在同一处停留时间太久以免烫伤 FPC。

4. Other matters in not clear before use, please contact our staff to guide.
